

TRANSPORTATION OF PEOPLE AND CARGO USING JAGUAR LAND ROVER VEHICLES DURING COVID 19

Jaguar Land Rover Global Guidance based on PHE Advice as a Jaguar Land Rover minimum, please also refer to local government guidelines which may be more stringent. Always use the most up to date PHE guidance from the links below.

TRANSPORT OF PEOPLE

No possible or confirmed COVID-19 cases should be transported in Jaguar Land Rover vehicles or by Jaguar Land Rover personnel. This should be performed by local healthcare services only. Driver conveying passengers in vehicle with a bulkhead, no anticipated direct contact: No PPE needed by driver.

Driver conveying passengers in vehicle without a bulkhead, and/or unable to maintain 2 metres distance: Fluid resistant Surgical masks for Driver and Passenger

DELIVERY OF ALL GOODS INCLUDING 3D VISORS

Our people should not be putting themselves at risk by not being able to maintain control in terms of SD guidelines and entering areas where this risk may be higher due to various reasons. Social Distancing and good hand hygiene remain the cornerstone to any planned activities, especially if locations are considered high risk.

VEHICLE CLEANING POST CONVEYANCE

Vehicle Cleaning post conveyance both (people and cargo) protocol located below:

[PLEASE CLICK HERE FOR REFERENCE](#)

SUMMARISED POST CONVEYANCE GUIDANCE

- All linen should be disposed of as infectious linen, as per local policy, at the receiving unit
- All waste should be disposed of as clinical waste, as per local policy, at the receiving unit
- Conveying staff are expected to wipe down any equipment and all surfaces with universal detergent or disinfectant wipes immediately following patient transfer – this should be completed before PPE is removed
- The vehicle should be left to ventilate with windows open and extractor fan set to extract whilst travelling to station or depot or base. Ensure this is done prior to removal of PPE
- The crew are to remove PPE in the designated area identified within the receiving unit
- All PPE is to be disposed of a clinical waste, as per local policy, at the receiving unit

VEHICLE CLEANING POST LOAN

Vehicle Cleaning post loan protocol here:

SUMMARISED POST LOAN GUIDANCE

The vehicle will require an enhanced between patient clean ensuring thorough decontamination of all exposed surfaces, equipment and contact areas before it is returned to normal operational duties, with universal sanitising wipes or a chlorine-based product.

- Appropriate PPE must be worn to decontaminate the vehicle - as a minimum this should include apron and gloves. Gloves for cleaning down should be splash resistant nitrile to EN420 standard
- Any exposed equipment (such as not within closed compartments) left on the vehicle will require decontamination with universal sanitising wipes or equivalent, as per the standard between patient clean
- All contact surfaces (cupboards, walls, ledges and so on), working from top to bottom in a systematic process, will require decontamination
- Pay special attention to all touch points
- Ensure that the stretcher is fully decontaminated, including the underneath and the base
- The vehicle floor should be decontaminated with a detergent solution

HAND-WASHING TECHNIQUE WITH SOAP AND WATER

Coronavirus

Wash your hands with soap and water more often for 20 seconds

Use a tissue to turn off the tap.
Dry hands thoroughly.

Palm to palm

The backs of hands

In between the fingers

The back of the fingers

The thumbs

The tips of the fingers
